

Equations and functions

1 Complete these:

$$5 + 4 = \boxed{9}$$
$$9 - 4 = \boxed{5}$$
$$9 - 5 = \boxed{4}$$

2 Make any two addition equation using different numbers such that the sum is 12

$$\boxed{8} + \boxed{4} = 12$$

$$\boxed{7} + \boxed{5} = 12$$

3 Make addition and subtraction equation using the following numbers

17 10 7

Addition equations

$$10 + 7 = 17$$

$$7 + 10 = 17$$

Subtraction Equations

$$17 - 10 = 7$$

$$17 - 7 = 10$$

Equations and functions

1 Complete these:

$$8 + 9 = \boxed{}$$

$17 - 9 = \boxed{}$

$17 - 9 = \boxed{}$

2 Make any two addition equation using different numbers such that the sum is 10

$$\boxed{} + \boxed{} = 10$$

$$\boxed{} + \boxed{} = 10$$

3 Make addition and subtraction equation using the following numbers

25

10

15

Addition equations

Subtraction Equations

Equations and functions

1 Complete these:

$$5 + 9 = \boxed{} \begin{array}{l} \nearrow 14 - 9 = \boxed{} \\ \searrow 14 - 5 = \boxed{} \end{array}$$

2 Make any two addition equation using different numbers such that the sum is 19

$$\boxed{} + \boxed{} = 19$$

$$\boxed{} + \boxed{} = 19$$

3 Make addition and subtraction equation using the following numbers

9 16 7

Addition equations

Subtraction Equations

Equations and functions

1 Complete these:

$$12 + 8 = \boxed{}$$
$$20 - 8 = \boxed{}$$
$$20 - 12 = \boxed{}$$

2 Make any two addition equation using different numbers such that the sum is 15

$$\boxed{} + \boxed{} = 15$$

$$\boxed{} + \boxed{} = 15$$

3 Make addition and subtraction equation using the following numbers

5 7 13

Addition equations

Subtraction Equations

Equations and functions

1 Complete these:

$$11 + 3 = \boxed{}$$

$14 - 11 = \boxed{}$

$14 - 3 = \boxed{}$

2 Make any two addition equation using different numbers such that the sum is 30

$$\boxed{} + \boxed{} = 30$$

$$\boxed{} + \boxed{} = 30$$

3 Make addition and subtraction equation using the following numbers

21

57

36

Addition equations

Subtraction Equations

Equations and functions

1 Complete these:

$$15 + 12 = \boxed{}$$
$$\swarrow \quad \searrow$$
$$27 - 15 = \boxed{}$$
$$27 - 12 = \boxed{}$$

2 Make any two addition equation using different numbers such that the sum is 45

$$\boxed{} + \boxed{} = 45$$

$$\boxed{} + \boxed{} = 45$$

3 Make addition and subtraction equation using the following numbers

22

6

16

Addition equations

Subtraction Equations

Equations and functions

1 Complete these:

$$11 + 16 = \boxed{}$$

$27 - 11 = \boxed{}$

$27 - 16 = \boxed{}$

2 Make any two addition equation using different numbers such that the sum is 43

$$\boxed{} + \boxed{} = 43$$

$$\boxed{} + \boxed{} = 43$$

3 Make addition and subtraction equation using the following numbers

56

13

43

Addition equations

Subtraction Equations

Equations and functions

1 Complete these:

$$11 + 44 = \boxed{}$$

$55 - 11 = \boxed{}$

$55 - 44 = \boxed{}$

2 Make any two addition equation using different numbers such that the sum is 51

$$\boxed{} + \boxed{} = 51$$

$$\boxed{} + \boxed{} = 51$$

3 Make addition and subtraction equation using the following numbers

33

4

37

Addition equations

Subtraction Equations

Equations and functions

1 Complete these:

$$23 + 28 = \boxed{}$$

\nearrow
 $\boxed{} - 23 = \boxed{}$

\searrow
 $\boxed{} - 28 = \boxed{}$

2 Make any two addition equation using different numbers such that the sum is 78

$$\boxed{} + \boxed{} = 78$$

$$\boxed{} + \boxed{} = 78$$

3 Make addition and subtraction equation using the following numbers

85

10

75

Addition equations

Subtraction Equations

Equations and functions

1 Complete these:

$$25 + 64 = \boxed{}$$

\nearrow
 $\boxed{} - 64 = \boxed{}$

\searrow
 $\boxed{} - 25 = \boxed{}$

2 Make any two addition equation using different numbers such that the sum is 88

$$\boxed{} + \boxed{} = 88$$

$$\boxed{} + \boxed{} = 88$$

3 Make addition and subtraction equation using the following numbers

17

28

45

Addition equations

Subtraction Equations
