

Numerator and denominator

1) Write the fraction for

a. Numerator = 2, Denominator = 5

b. Denominator = 5, Numerator = 4

2) What fraction is coloured?

3) Colour the fraction:

$$\frac{1}{6}$$

$$\frac{5}{6}$$

Numerator and denominator

1. Write the fraction for

a. Numerator = 3, Denominator = 5

b. Denominator = 3, Numerator = 1

2. What fraction is coloured?

3) Colour the fraction:

$$\frac{1}{12}$$

$$\frac{5}{12}$$

Numerator and denominator

1) Write the fraction for

a. Numerator = 7, Denominator = 8

b. Denominator = 5, Numerator = 2

2) What fraction is coloured?

3) Colour the fraction:

$$\frac{1}{3}$$

$$\frac{1}{4}$$

Numerator and denominator

1) Write the fraction for

a. Numerator = 4, Denominator = 11

b. Denominator = 11, Numerator = 2

2) What fraction is coloured?

3) Colour the fraction:

$$\frac{1}{2}$$

$$\frac{1}{6}$$

Numerator and denominator

1) Write the fraction for

a. Numerator = 1, Denominator = 8

b. Denominator = 3, Numerator = 1

2) What fraction is coloured blue and what fraction is coloured green?

3) Colour the fraction:

$$\frac{1}{9}$$

$$\frac{1}{5}$$

Numerator and denominator

1) Write the fraction for

a. Numerator = 1, Denominator = 8

b. Denominator = 3, Numerator = 1

2) What fraction is coloured blue and what fraction is coloured yellow?

3) Colour the fraction:

$$\frac{1}{3}$$

$$\frac{3}{10}$$

Numerator and denominator

1) Write the fraction for

a. Numerator = 11, Denominator = 15

b. Denominator = 13, Numerator = 8

2) What fraction is coloured yellow and what fraction is coloured green?

3) Colour the fraction:

$$\frac{1}{4}$$

$$\frac{1}{5}$$

Numerator and denominator

1) Write the fraction for

a. Numerator = 20, Denominator = 23

b. Denominator = 50, Numerator = 1

2) What fraction is coloured blue and what fraction is coloured green and what fraction is coloured yellow?

3) Colour the fraction:

$$\frac{1}{3}$$

$$\frac{1}{2}$$

Numerator and denominator

1) Write the fraction for

a. Numerator = 4, Denominator = 9

b. Denominator = 9, Numerator = 5

2) What fraction is coloured blue and what fraction is coloured green and what fraction is coloured yellow?

3) Colour the fraction:

$$\frac{1}{3}$$

$$\frac{1}{4}$$

Numerator and denominator

1) Write the fraction for

a. Numerator = 6, Denominator = 15

b. Denominator = 30, Numerator = 13

2) What fraction is coloured blue and what fraction is coloured green and what fraction is coloured yellow?

3) Colour the fraction:

$$\frac{3}{5}$$

$$\frac{2}{6}$$
