## The Dolphin Show

Raza is very excited today. He is going to a "Dolphin Show" with his family. "Dolphins are very playful and intelligent mammals that live in the sea. They are extremely social and

they love to make friends with people", said his mother.

"And also, dolphins can move as fast as eight miles per hour in the water. There are around 40 species of dolphins found in the waters around the world", said his father.

At the show, Raza watched the dolphin move its pair of flippers to turn direction. He also watched the trainer throw small fish, squids and other small sea creatures to the dolphin.

Raza had a fun time watching the dolphin dance and perform stunts. "Mmmm, the dolphin is indeed very intelligent, the way it finds its food and the way it performs tricks is amazing", said Raza.

In the end, Raza and his family had their photograph taken with the dolphin.
