The Twins' Trick

Aasya and Aleena are twins. They looked exactly like each other when they were babies. As they are growing up, their faces still look the same and so do their hairstyle and behavior. Both of them wear glasses and have long, straight, black hair.

But now with time, Aasya has become an inch taller than Aleena and when they stand together, their friends and relatives can tell which one of them is Aasya and which one is Aleena.

Once, Aasya was invited to her best friend's birthday party but she was feeling sick. She did not want to upset her friend and so she decided to send Aleena instead of her. "Nobody will be able to tell it's not me", said Aasya.

And so it happened. Aleena went to the party all dressed up and looking glamorous and nobody was able to figure out that she was not Aasya! She played games with all the kids there and had a ball of a time.

The Twins' Trick

Answer the following questions.
