## 4 DIGIT NUMBERS

## NUMERATION OF 4 DIGIT NUMBERS

Numeration of digits is basically a process of reading, writing, counting, expressing as words, naming the numbers and detailing of its parts etc, whether 2 digits, 3 digits, 4 digits or so on.

For example, a 4 digit number 4567 can be expressed as followings
$\rightarrow$ Standard form $=4567$
$\rightarrow$ Words = four thousand five and sixty seven
$\rightarrow$ Expanded form $=4000+500+60+7$
$\rightarrow$ sum of place values $=4$ thousands +5 hundreds +6 tens +7 units
