

WORKSHEET#10

Use the method of **repeated subtraction** to solve the following division problems.

1. $63 \div 9 =$

- $63 - 9 = 54$ $18 - 9 = 9$
- $54 - 9 = 45$ $9 - 9 = 0$
- $45 - 9 = 36$
- $36 - 9 = 27$
- $27 - 9 = 18$

$63 \div 9 = 7$ since 9 is
Subtracted from 63 9
times.

2. $45 \div 5 =$

3. $100 \div 10 =$

4. $75 \div 15 =$

5. $18 \div 2 =$

6. $150 \div 50 =$

7. Teacher has 40 pencils with her. She has to distribute them among 10 students of her class. How many pencils will each student get?

Each student will get pencils each.

Division equation for the problem :

Write the problem as a repeated subtraction problem.

 _____

WORKSHEET#10

1) 7 2) 9 3) 10 4) 5 5) 9 6) 3

7) → each student will get 4 pencils

→ $40 \div 10 = 4$

→ $40 - 10 - 10 - 10 - 10 = 0$
