

Answers

1. Who is the story about?

The story is about producers and consumers, and how our ecosystem needs both to survive.

2. What is a producer?

Producers can produce their own food from the energy of the sun. Plants are producers.

3. What is a consumer?

A consumer is an animal that consumes plants or other animals. Consumers can not produce their own food, and get energy from the things they eat

4. How does a consumer need a producer?

Consumers depend on producers for the food which gives them energy.

5. How does a producer need a consumer?

Producers need consumers to help them reproduce by spreading seeds or pollen.

6. What are you - a producer or a consumer?

Humans are consumers. We can not produce our own food, and we get our energy from eating other consumers or producers.
