Solve the following division word problems.

1) There are 30 candies in a packet. How many candies will each child get, if these 30 candies are divided equally among 5 children?

Solution:

30 candies – 5 children

30 ÷ 5 = 6 ⟹ **Each child will get 6 candies.**

2) 60 oranges were equally shared by 10 friends. How many oranges did each one get?

3) 72 children were equally divided in 8 groups by the teacher. How many children are there in each group?

4) A truck driver has to drive 2466kms in 2 days. How many kilometers will he drive each day?

5) Father has to equally divide $255 among his 5 servants. How many dollars will he give to each servant?
