

The value of

. From ones to ten thousands

Worksheet 10: Solve the following word problem.

1. I deposited \$ 60 yesterday. I withdraw the \$45 last night. I happen to have a money today and deposited \$ 30. How much money do I have in my account?
 $(\$ 60 - \$ 45) + \$30 = \$45$
2. My mother-sister gave me 7 candies last Easter, I did not eat even one but my classmate traded 3 candies in exchange of the same number of mine. On our birthday, my mother-sister gave me again a double number of candies that I received last Easter. How many are my candies overall?
3. Every day, you are saving money in your piggy bank. On the first day, you saved Php7.00. On the following days, you are saving 3 times more than you saved on the first day. How much money have you saved after 3 days in your piggy bank?
4. Joe has 10 pieces of 20 peso-bill. If he buys 14 pieces of cookies worth Php5.00 each and 7 pieces of Zest-O drinks worth of Php10.00 each. How much money would be left to him?
5. Matt ate 100 raisins over a five-day period. Each day, he would eat six more raisins than the previous day. How many raisins did he ate on the first day?

The value of

. From ones to ten thousands

Answer Key:

Worksheet No. 10

2. $7 + (7 \times 2) = 21$

3. $7 + 3(7 \times 3) = 70$ Or $7 + 21 + 21 + 21 = 70$

4. $(10 \times 20) - (14 \times 5) - (7 \times 10)$

$200 - 140$

60

5.6
