'Counting and Making Bills'

We count the dollars bills in the same way as we count the coins.

A five dollar (\$5) bill is equal to 5 one-dollar bills.

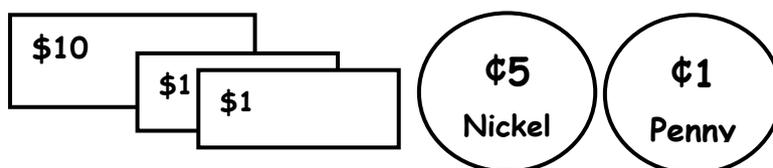

A ten dollar (\$10) bill is equal to 2 five-dollar bills or 10 one-dollar bills.

For Example:

➔ If we count the above bills, they add up to make **\$34**.

Similarly, we can count coins along with bills too.

➔ The above coins and bills add up to make **\$12.06**.
