

TIME

(WORD PROBLEMS)

Word problems involving **TIME** are easy to handle like all other word problems!

When solving the time related word,
keep in mind that

1 hour = 60 minutes

A few points to keep in mind while solving a word problem involving time.

It will be a lot easier for you if you know what you have to find out, e.g.

- Starting time
- Ending time
- Or the time duration

For example

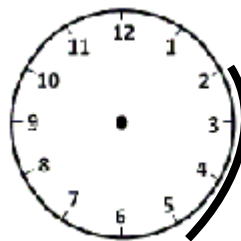

Alice takes a cooking class every day. It's a 3 hour long class which begins at 2:00 pm. When does the class end?

Here, the starting time of the class is given i.e. **2:00 pm** and also the duration of the class which is **3 hours**.

We have been asked to find the time when the class ends.

Its 5:00 pm after 3 hours are past starting from 2:00pm.

So, the class ends at 5:00pm

**Its 5:00 pm
after 3 hours**
