Division of Grams and Kilograms

We divide a weight in grams or kilograms by a number like we divide simple numbers. We just add the unit in our answer.

Look at the example for complete idea.

For Example: Divide 525 kg by 3.

Solution:

→ $525 \text{ kg} \div 3 = (525 \div 3) \text{ kg} = 175 \text{ kg}$

By long division:

		1	7	5	
3		5	2	5	
		3			
		<hr/>			
		2	2		
		2	1		
		<hr/>			
			1	5	
			1	5	
		<hr/>			
				0	

$525 \text{ kg} \div 3 = 175 \text{ kg}$
