HANDLING DATA

'Pictorial Representation of Data'
(Pictographs)

A **Pictograph** is a way to represent data. It uses pictures or specific symbols to show or represent the information you have collected.

Each picture can represent **1** or **more** items.

There is always a **key** in a pictograph to show how many each picture represents.

The following pictograph shows the number of children present in class on each day of the week.

Monday	☺ ☺ ☺ ☺ ☺ ☺
Tuesday	☺ ☺ ☺ ☺
Wednesday	☺ ☺ ☺ ☺ ☺
Thursday	☺ ☺ ☺ ☺ ☺ ☺
Friday	☺ ☺ ☺

Key: ☺ represents 5 children

The pictograph shows that there are 30 children present on Monday, 20 children present on Tuesday, 25 present on Wednesday and so on.
