

7 - Digit rounding off
WORKSHEET#9

1. ?

Let's talk about planes and answer the questions using round off the numbers.

a) During July, at the airport was recorded an increase in the number of passengers. Namely, as many as **2 342 153** passengers. On the news, there was an approximate number. Grandma Natalie heard **2 000 000**, while Grandma Dorothy heard that there were **3 000 000** passengers. Which Grandma is right?

b) After the summer season, the number of passengers decreased, so for the next two months there were **1 535 842** passengers, which is half a million less than last year at the same time. How many passengers, approximately, were recorded last year?

c) In March, this year, the profit of the airport was only **\$ 9 489 950**. Round off that sum to the nearest hundred, and then compare it with **\$ 9 500 000**.

d) Based on **7 563 787** ratings of satisfied passengers during this summer, we can say that the airline has made a great success. That's about:

- A. **7 500 000** different opinions.
- B. **7 600 000** different opinions.

1.

a) Grandma Natalie

b) 2 000 000 passengers

c) \$ 9 490 000

\$ 9 490 000 < \$ 9 500 000

d) B
