

Nets
WORKSHEET#9

1. ?

In the picture below, the spot covers one vertex of the tetrahedron. Follow the instructions and build it.

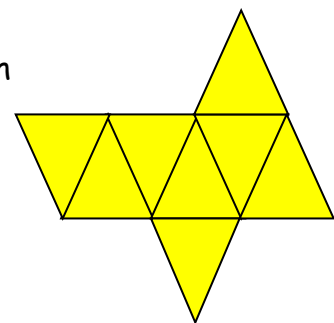

- Copy each net shown below and set the remaining two parts of the spot so that after assembling the tetrahedron all three parts will be at the same vertex.
- Draw tabs as shown.
- Cut out the net and fold all sides to see if you have accurately set spots.

2. ?

Follow the instructions and build an octahedron.

- Copy the nets below of an octahedron onto 1 cm triangular dot grid paper.
- Decide where to draw tabs.
- Carefully, using scissors, cut out the net and with the help of glue assemble all faces.
