# NUMBERS

## 'Ordering Sets of Numbers'

**Ordering sets of numbers** is a method in which sets of numbers or objects are compared and put in order based on a single factor such as length, mass, or capacity.

**Least to Greatest** is arranging numbers in ascending or increasing order. It starts with the smallest number to the highest number.

For example:    $1, 2, 3, 4, 5, 6, 7, 8, 9, 10$

**Greatest to Least** is arranging numbers in descending or decreasing order. It starts with the highest number to the smallest number.

For example:    $10, 9, 8, 7, 6, 5, 4, 3, 2, 1$
