SUBTRACTION

'Subtraction of 5 digit numbers (with & without regrouping) '

Subtraction of 5 digit numbers is same as subtracting any 2 other numbers, like we have been doing before. Just be careful where you need to regroup!

Look at the following example to understand completely.

Example: **Subtract.**

$$
\begin{array}{r}
4\ 1\ 7\ 4\ 5 \\
-\ \ 1\ 2\ 2\ 7\ 0 \\
\hline
\\
\hline
\end{array}
$$

Solution:

$$
\begin{array}{r}
{}^{3}\cancel{4}\ 1\ {}^{11}\cancel{7}^{6}\ {}^{1}4\ 5 \\
-\ \ 1\ 2\ 2\ 7\ 0 \\
\hline
\boxed{2\ 9\ 4\ 7\ 5} \\
\end{array}
$$
