SUBTRACTION

'Subtraction of 6 digit numbers (with & without regrouping)'

Subtraction of 6 digit numbers is same as subtracting any 2 other numbers, like we have been doing before. Just be careful where you need to regroup!

Look at the following example to understand completely.

Example: Solve

$$
\begin{array}{r}
7\ 9\ 4\ 0\ 4\ 5 \\
-\ \ 3\ 6\ 2\ 5\ 0\ 2 \\
\hline
\\
\hline
\end{array}
$$

Solution:

$$
\begin{array}{r}
7\ 9\ \overset{3}{\cancel{4}}\ \overset{10}{0}\ 4\ 5 \\
+\ \ 3\ 6\ 2\ 5\ 0\ 2 \\
\hline
4\ 3\ 1\ 5\ 4\ 3 \\
\hline
\end{array}
$$
