

DIVISION

'Word Problems'

Word problems involving division are easy to solve.

Read the problem, collect the data and apply the operation accordingly.

Look at the following example to understand completely.

Example:

How many dollars will each child get if \$2550 were to be divided equally among 15 children?

Solution:

We will divide the total amount with 15.

$$2550 \div 15 = \boxed{170}$$

$$\begin{array}{r} 170 \\ 15 \overline{) 2550} \\ \underline{15} \\ 105 \\ \underline{105} \\ 0 \\ \underline{0} \\ 0 \end{array}$$
