

## ADDITION

### 'Word Problems'

Addition word problems are easy to solve.

Read the problem, collect the data and apply the operation accordingly.

Look at the following example to understand completely.

#### **Example:**

45,700 people attended the concert on Saturday and 67,665 people attended the concert on Sunday. How many people attended the concert over the weekend?

**Solution:**

We will add the number of people who attended the concert on both the days.

$$\text{Total} = 45,700 + 67,665 = \boxed{63365}$$

$$\begin{array}{r} \phantom{+} 1 \phantom{0} \phantom{0} \phantom{0} \phantom{0} \\ 4 \phantom{0} \phantom{0} \phantom{0} \phantom{0} \phantom{0} \\ + \phantom{0} \phantom{0} \phantom{0} \phantom{0} \phantom{0} \\ \hline \boxed{6 \phantom{0} \phantom{0} \phantom{0} \phantom{0} \phantom{0}} \end{array}$$
