## SUBTRACTION

'Word Problems'

Subtraction word problems are easy to solve.
Read the problem, collect the data and apply the operation accordingly.

Look at the following example to understand completely.

## Example:

875,645 people live in a city $A$. In city $B, 125,550$ less people live than city $B$. how many people live in city $B$ ?

## Solution:

We will subtract the numbers to get the desired result.
$875,645-125,550=750095$

$$
\begin{aligned}
& 5 \quad 14 \\
& \begin{array}{llllll}
8 & 7 & 5 & 6 & 4 & 5
\end{array} \\
& \text { - } 125550 \\
& \begin{array}{llllll}
7 & 5 & 0 & 0 & 9 & 5
\end{array}
\end{aligned}
$$
