

TIME

'Word Problems'

We have already learned how to solve time word problems.

Carefully check if the time in the problem is in **12-hours** clock or **24-hours** clock and then solve it accordingly.

Lets have a look at the following examples.

Example1:

Sara started doing her work at 14:00 hrs and finished it at 16:40 hrs. How much time did she take to finish her work?

Solution:

Here the times given are in 24-hour clock and we have to find the time elapsed.

→ Sara took **2 hrs and 40 mins** to finish her work.

Example2:

Ali left home for work at 10:15 a.m. and reached there after exactly 2 hours. What was the time when he reached his work place?

Solution:

Here the times given are in 12-hour clock and we have to find the ending time.

→ Ali reached there at **12:15 p.m.**
