

Grade 7 Vocabulary

Week 35: Worksheet 3

Directions: Phil is writing an article about the motorsport event for the newspaper. Help him fill in the missing words to complete the article.

The *Motorsport Extravaganza* has been an amazing experience that demonstrates the _____ (*enhanced, feat, prototype*) that is racing in every aspect. Whether you are interested in motocross with motorcycles and dirt bikes, the quick speed races of the uniquely shaped _____ (*dragster, contender, pace car*), or the lengthy _____ (*caution, dragster, laps*) of more formal racing, this event can deliver.

The first day was focused on the faster, shorter races including those with the dragsters and dirt bikes. A twisting, turning course was created for dirt bike demonstrations of skill and agility. The difference between the bikes and the cars was mostly the type of course and where they did _____ (*apex, burnout, contender*). Cars tended to do this at the start line, but bikes had a special box. The short dragster course had a large light that moved from red to yellow and finally green where they spun out as quickly as possible. The smell of burning rubber added to and _____ (*enhanced, photo finish, caution*) the overall experience.

The last two days were reserved for different races and events for _____ (*inspectors, rookies, prototypes*) who were strong drivers, but not yet competing professionally. A few served as _____ (*relief drivers, prototypes, apex*), but most were just starting their career. My favorite part was being asked to ride in the _____ (*dragster, contender, pace car*) for the first race. We made two slow _____ (*caution, burnout, laps*) and then pulled off to watch as the cars flew by at top speeds. I recommend this event for those of all ages.

Answer Key

Worksheet 3

feat

dragster

laps

burnout

enhanced

rookies

relief drivers

pace car

laps
