

Directions: Finn had to prepare an argument for speech class on the topic of taking the COVID-19 vaccine. Help him fill in the missing words to complete the argument against taking the vaccine.

Today, I am making an argument against the COVID-19 vaccine being a requirement for removal of the _____ (mandatory, efficacy, faltering) mask requirement that has been in place for many months. Though I agree that we must be _____ (contracted, cautious, subservient) when it comes to lifting some restrictions, the idea that a specific vaccine, whose _____ (mandatory, faltering, efficacy) has not been shown long term is ridiculous.

It is well documented that COVID can be fatal, but many have recovered. The flu can be deadly as well, but vaccines are not forced on people every year. It feels _____ (inbound, implement, intrusive) that the government is tracking not just COVID _____ (incidence, efficacy, tourism), but who has received the vaccine and which brand was utilized. This makes it feel as if we are simply a _____ (inbound, cautious, subservient) group of people being used as lab rats.

People were fine with having a _____ (quarantine, incidence, intrusive) that lasted for weeks beyond what was predicted and even stopping _____ (efficacy, inbound, recoup) flights, which damaged the _____ (intrusive, tourism, quarantine) industry greatly. Still, trying to require, or in some cases, force people to be vaccinated to live their lives seems very wrong. We do not know enough about this new, largely untested vaccine that was pushed through the approval process. People need the right to refuse, but still live their lives as they deem appropriate.

Answer Key

Worksheet 3

mandatory

cautious

efficacy

intrusive

incidence

subservient

quarantine

inbound

tourism
